

NOTES TO USERS

This map is a component of the National Flood Insurance Program. It is necessary to identify areas subject to flooding, particularly from local sources of small size. The **comprehensive repository** should be used for updated or additional flood hazard information.

For more detailed information in areas where **Base Flood Elevations** and/or **Roadways** have been determined, users are encouraged to consult **Profiles and Floodway Data** and/or **Summary of Streamflow Elevations** tables in the Flood Insurance Study (FISM) for this jurisdiction. Users should be aware that BFEs shown on the FISM represent whole-flood elevations. These BFEs are intended for flood insurance purposes only and should not be used as the sole source of flood elevation data. Other flood elevation data presented in the FISM should be utilized in conjunction with the FISM for purposes of design and/or floodplain management.

Base Flood Elevations shown on this map apply only landward of the American Vertical Datum of 1988 (NAVD 88). Users of this FISM should note that certain features depicted are also based on the Summary of Elevation tables in the Flood Insurance Study report for this jurisdiction. The Summary of Streamflow Elevations tables should be used for design and/or floodplain management purposes when they are higher than elevations shown on this FISM.

Elevations of the floodways were computed at cross sections and interpolated across sections. The floodways were based on hydraulic considerations and to requirements of the National Flood Insurance Program. Floodway and pertinent floodway data are provided in the Flood Insurance Study report for this jurisdiction.

Areas not in Special Flood Hazard Areas may be protected by flood structures. Refer to Section 2.4, "Flood Protection Measures" of the Insurance Study report for information on flood control structures for this jurisdiction.

The projection used in the preparation of this map was New Jersey State Plane NAD 2990. The horizontal datum is NAD 83, GRS80. The vertical datum is NAVD 88. The horizontal and vertical projections of the FISM in the area of adjacent jurisdictions may result in slight positional differences in map features across jurisdictional boundaries. These differences do not affect the accuracy of this FISM.

Vertical elevations on this map are referenced to the North American Vertical Datum of 1988 (NAVD 88). These flood elevations must be compared to structure and ground elevations on the same vertical datum. For more information regarding the difference between the National Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1988, visit the National Geodetic Survey website at www.ngs.noaa.gov or contact the National Geodetic Survey at 301-734-8044.

In current elevation, description, and/or location information for Bench shown on this map, please contact the Information Services Branch, National Geodetic Survey at 301-734-3362 or visit its website at www.ngs.noaa.gov.

The information shown on this FISM was provided in digital format by the New Jersey Department of Environmental Protection. This information was digitized orthographic projected at a scale of 1:24000 with a 1-foot pixel from photography taken April 2002.

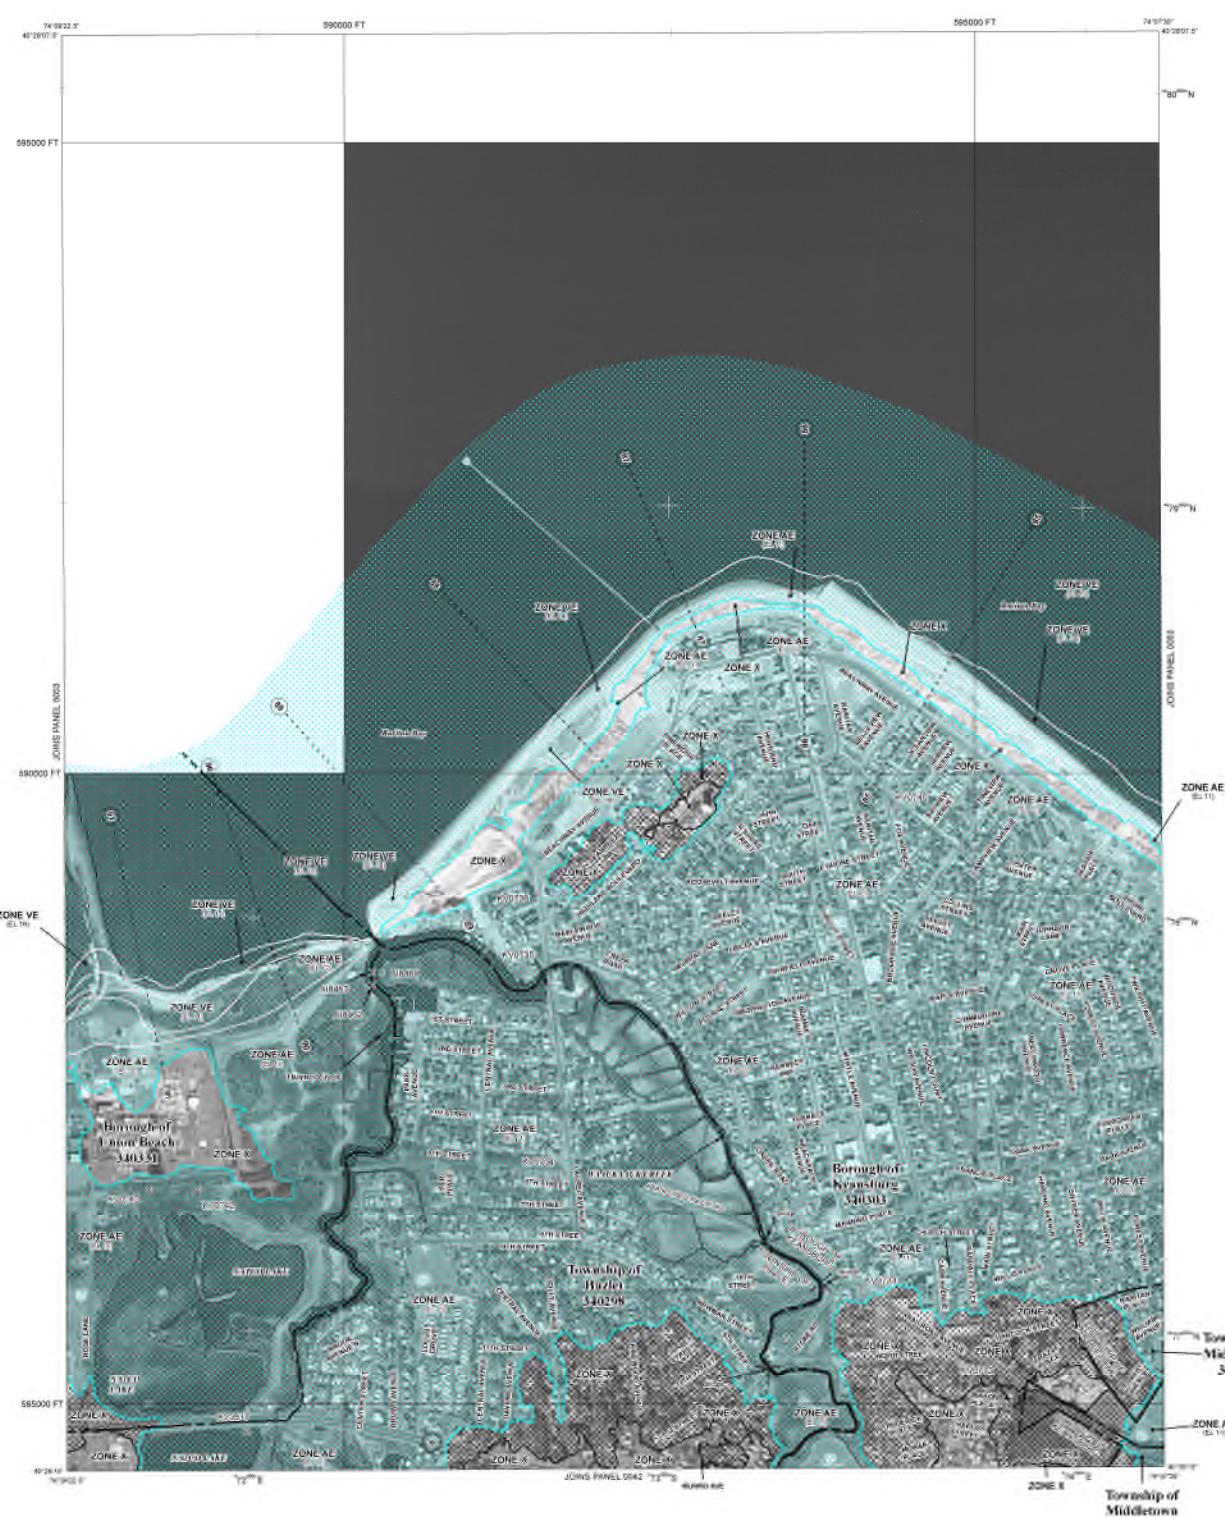

In updated topographic information, this map reflects more detailed and up-to-date stream channel configurations and floodplain delineations than shown on this previous FISM for this jurisdiction. As a result, the flood elevations shown on this map may differ from those shown on previous maps. Automatic hydrologic events may reflect stream channel changes that are not shown on this map. Users must be familiar with relationships for stream channels and flood elevations on previous maps.

If changes occur in or near the area, refer to the best available information. Boundaries change due to anniversaries or re-measurements that occurred after this map was published, may cause insured content appropriate by officials to verify current community limit location.

To obtain the **Accurately Printed Map Index** for an accurate map of the area, the location of state, county, town, and community boundaries, and the location of communities taking part in the National Flood Insurance Program in the community, as well as a listing of streets on which each building is located, contact your local insurance agent or call:

The FEMA Map Service Center at 1-800-338-1111 for information on products associated with the FISM. Available products may include a **Summary Letter of Map Change** (a Flood Insurance Study report), and/or a **Map of this Area**. The FEMA Map Service Center may also be reached at 1-800-338-1111 or via website at <http://firms.fema.gov>.

Questions about the map or questions concerning the National Flood Insurance Program in general, contact 1-877-FEMA MAP (1-877-362-2627) or FEMA website at <http://www.fema.gov>.
